INTERIM COMMERCIAL ITEM DESCRIPTION

PASTE, PREVENTIVE DENTISTRY (Fluoridated)

The General Services Administration has authorized the use of this Interim Commercial Item Description which was developed by DLA, Defense Personnel Support Center, Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, based upon currently available technical information.

This interim commercial item description covers a fluoridated preventive dentistry paste suitable for use in dental prophylaxis procedures. The paste shall be furnished in the following grits, as specified in the procurement documents:

GRIT - Fine
Medium

The paste shall be Nupro Prophylaxis Paste with Fluoride, fine or medium grit (as applicable) in 200 unit-dose cups, as manufactured by Johnson and Johnson Dental Products Co., or equal, with the following salient characteristics:

Salient characteristics:

The paste shall be a fluoridated, non-splattering preventive dentistry paste suitable for use in dental prophylaxis procedures. The paste shall be capable of removing dental plaque, materia alba, and extrinsic stain from tooth structure with insignificant splattering and without undo abrasion, while imparting a polished luster to the teeth. The paste shall contain sodium fluoride with a free fluoride content of 1.10 to 1.40% by weight and a cellulose-silicate-glycerin anti-splatter aqueous binder of suitable consistency. The paste shall have a pleasant orange, cherry, mint, or tropical fruit flavor and odor. The paste shall be color coded to differentiate the fine from the medium grit paste.

The fine grit paste shall contain 25 to 30% by weight of diatomaceous silica with a mean particle size of 8-10 microns. The fine grit paste shall have a Relative Enamel Abrasion (REA) value of 8 maximum, a Cleaning Ratio of 162 minimum, and a Polish Ratio of 12 minimum, when tested by the in vitro methods developed by the Oral Health Research Institute of Indiana University.

AMSC N/A FSC 6520

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

The medium grit paste shall contain 50 to 55% by weight of pumice with 72% of particles less than 43 microns. The medium grit paste shall have an REA value of 22 maximum, a Cleaning Ratio of 205 minimum, and a Polish Ratio of 9 minimum, when tested by the methods referenced above.

The paste shall have a minimum shelf life of 24 months from date of manufacture. No less than 20 months of the expiration dating period shall remain at time of delivery to the Government.

The paste shall be packaged in 200 2-gram unit-dose, clear plastic cups sealed with a removable laminated metallized cover to prevent evaporation. The minimum weight of paste in the 200 cups shall be 380 grams for the fine grit, and 400 grams for the medium grit, respectively. The cup shall be designed to fit into a prophy finger ring holder. A holder shall be included with each unit of issue.

Workmanship. The paste shall be free from defects which detract from its appearance or impair its serviceability, such as separation, settling, and color non-uniformity.

Unit. Package (PG). One package containing two hundred, 2 gram unit dose cups of medium or fine grit pumice each sealed to prevent evaporation, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item. Inspection shall be conducted to determine compliance with specification requirements.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. Where feasible, the same sample shall be used for the determination of two or more inspection characteristics. The unit of product for inspection purposes shall be one unit package. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, AQL 2.5, and sampling for tests (when applicable) shall be conducted at inspection level S-1, AQL 1.0.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractor/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
