Use/relationship: The Workload Reporting System (WRS) Report documents the status of the contractors' effort towards achieving contract objectives. The WRS is used to compile monthly work data for resource management purposes. Air Mobility Command (AMC) Form 82, *"Monthly Station Traffic Handling Report [AMC-A4T(M) WRS],"* is used as a manual reporting procedure for locations unable to access the WRS site. (AMC Form 82 can be obtained at: https://static.e-publishing.af.mil/production/1/amc/form/amc82/amc82.pdf). The Report identifies a breakdown of specific workload activities at each Aerial Port location. The WRS Report is utilized to determine human resource and equipment allocations at air terminals.

This Data Item Description (DID) contains the format, content, and intended use information for the data deliverable resulting from the work task described in the solicitation.

Requirements:

1. **Reference Documents.** The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. **Format.** The WRS Report shall be in Microsoft Excel format.

3. **Content.** The WRS Report shall contain the following:
   a. For each Aerial Port Code (APC) location:
      1. Number of WRS reports returned to the APC per month
      2. Number of reports input into WRS by the contractor per month
      3. Number of rejected WRS reports returned to the APC for corrections per month
   b. System account information, to include the following:
