Data Item Description

Title: MANUFACTURING MANAGEMENT REQUIREMENTS

Number: DI-MGMT-82496A
AMSC Number: N10699
DTIC Applicable: No
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20260922
Limitation: N/A
GIDEP Applicable: No
Project Number: SESS-2026-042

Use/relationship: The Manufacturing Management Requirements plan describes how the contractor intends to implement AS6500A across the program by managing all aspects of manufacturing. MIL-HDBK-896 can also be used as a guide. This plan will be used for production planning and risk management.

This DID contains format, content, and intended use information for the data product resulting from the work task described in the contract Statement of Work (SOW).

This DID supersedes DI-SESS-82496.

Requirements:

1. Referenced Documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

1.1. SAE AS6500A - Manufacturing Management Program (available at https://sae.org.)

1.2. MIL-HDBK-896 Manufacturing Management Program Guide (available at http://quicksearch.dla.mil.)

2. Format. Contractor's format is acceptable.

3. Content. The Manufacturing Management Requirements shall include the following:

3.1. Table of Contents.

3.2. Glossary/Acronyms.

3.3. Scope. Identify tailoring and conformance of AS6500A requirements. Requirements are applicable for all phases of the acquisition life cycle as specified in the contract.

Check the source to verify that this is the current version before use.

3.4. Reference Documents. A complete list of compliance and reference documents used to develop this data.

3.5. Requirements. For the following sub-sections, specify implementation or plans to implement each requirement. If tailoring a section out, provide justification. If tailoring out or reserving for a future program phase, include which program phase the section would be applicable.

3.5.1. Manufacturing Management System. This section describes the manufacturing management system which complies with AS6500A. This includes an organization chart (depicting function) to meet AS6500A requirements as well as manufacturing management system and all updates and changes.

3.5.2. Design Analysis for Manufacturing. This section describes the integration of manufacturing into the product design and development process.

3.5.2.1. Producibility Analysis

3.5.2.2. Key and Critical Characteristics

3.5.2.3. Process Failure Modes Effects Analyses (PFMEA)

3.5.3. Manufacturing Risk Identification. This section describes manufacturing risk management.

3.5.3.1. Manufacturing Feasibility Assessments

3.5.3.2. Manufacturing Readiness Level (MRL) Assessments

3.5.3.3. Production Readiness Reviews (PRRs)

3.5.4. Manufacturing Planning. This section describes the manufacturing planning.

3.5.4.1. Manufacturing Plan

3.5.4.2. Materials Management

3.5.4.3. Manufacturing Technology Development

3.5.4.4. Cost

3.5.4.5. Manufacturing Modeling and Simulation

3.5.4.6. Manufacturing System Verification

Check the source to verify that this is the current version before use.

3.5.4.7. Manufacturing Workforce

3.5.4.8. Tooling/Test Equipment/Facilities

3.5.4.9. Measurement System Analysis (MSA)

3.5.5. Manufacturing Operations Management. This section describes the implementation of manufacturing operations management.

3.5.5.1. Production Scheduling and Control

3.5.5.2. Manufacturing Surveillance

3.5.5.3. Continuous Improvement

3.5.5.4. Variability Reduction (VR)

3.5.5.5. Process Capabilities

3.5.5.6. Production Process Verification (PPV)

3.5.5.7. First Article Inspections (FAIs) / First Article Tests (FATs)

3.5.5.8. Supplier Management

3.5.5.9. Supplier Quality

End of DI-MGMT-82496A
