DATA ITEM DESCRIPTION

Title: SOFTWARE LEVEL OF RIGOR SAFETY REPORT (SLORSR)

Number: DI-SAFT-82493

Approved Date: 20250715

AMSC Number: F10585

Limitation: N/A

DTIC Applicable: No

GIDEP Applicable: No

Preparing Activity: 40 (AFMC/SE)

Project Number: SAFT-2025-011

Applicable Forms: N/A

Use/Relationship: The Software Level of Rigor Safety Report (SLORSR) is a comprehensive accounting of all Level of Rigor (LOR) related work per MIL-STD-882E(C1) paragraph 4.4.

This Data Item Description (DID) contains the content and format preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

a. This DID is related to DI-SAFT-80102, *Safety Assessment Report (SAR)*; and DI-SAFT-80105 *System Safety Program Progress Report (SSPPR)*.

(Copies of these DIDs are available online at https://quicksearch.dla.mil.)

Requirements:

1. Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format. The SLORSR shall be in the contractor's format.

3. Content. The SLORSR shall include the following information:

3.1 Introduction. State, in narrative form, the purpose of the SLORSR.

3.2 Overview: A brief overview of the software architecture and its roles within the system.

3.2.1. The program's definition of what a Unit of Software is (e.g. Computer Software Configuration Item (CSCI), Computer Software Component (CSC), Computer Software Unit (CSU); this definition is to be used in all documentation required by this DID).

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

3.2.2. Information needed to properly characterize how software is partitioned into the units of software as documented within the SLORSR.

3.3 SwCI/LOR Determination: The rationale supporting how the Software Criticality Index (SwCI)/LOR was derived for each Unit of Software.

3.3.1. For each unit of software, list the Software Control Category (SCC) per MIL-STD-882E(C1) Table IV with the accompanying supporting rationale applicable to the SCC.

3.3.2. For each unit of software, the rationale behind determining the worst potential Severity per MIL-STD-882E(C1) Table I for the unit of software. Several hazards may involve the same unit of software, the most severe Severity; the most severe Severity is used.

3.3.3. For each unit of software, list the derived Software Criticality Index (SwCI) per MIL-STD-882E(C1) Table V and the accompanying tier of Level of Rigor (LOR).

3.4 LOR Activities

3.4.1. Describe each LOR Activity for each LOR Tier (corresponding to SwCI Tier).

3.4.2. Provide LOR artifacts correlated to each LOR activity for each Unit of Software.

3.5 LOR Activity Status:

3.5.1. Define the timeline when MIL-STD-882E(C1) Table VI will be queried. Typical program timelines may include prior to Preliminary Design Review (PDR), prior to Critical Design Review (CDR), prior to formal testing, prior to fielding, and periodically during sustainment.

3.5.2. For each unit of software, provide status of MIL-STD-882E(C1) Table VI questions for each LOR activity.

3.5.3. For each LOR Teir's Activity:

3.5.3.1 Annotate what is left to be defined.

3.5.3.2 Annotate Government Management (PM) decision to expend additional resources to define LOR activity or to obtain Risk Acceptance Authority's formal acceptance for the unspecified LOR Tier (if any). If unavailable, highlight the need for a decision to be made.

3.5.4 Summarize applicable LOR task activities.

3.5.4.1 For each unit of software for each LOR task activity, provide or cite the reference to all program artifacts required to show compliance with the LOR task activity. Provide partial artifacts if available.

3.5.4.2 Annotate specifically what is incomplete with the LOR criteria.

Check the source to verify that this is the current version before use.

3.5.4.3 Annotate Government PM decision to expend additional resources to define the LOR activity or obtain Risk Acceptance Authority's formal acceptance for the incomplete LOR activity. In unavailable, highlight the need for a decision to be made.

End of DI-SAFT-82493
