DATA ITEM DESCRIPTION
Title: SOFTWARE BILL OF MATERIALS (SBOM)

Number: DI-SCRE-82505
AMSC Number: 10607
DTIC Applicable: N/A
Preparing Activity: RS

Approval Date: 20251204
Limitation: N/A
GIDEP Applicable: No
Project Number: SCRE-2025-003

Applicable Forms: N/A

Use/relationship: The Software Bill of Materials (SBOM) provides information that defines the software components for a particular system. The details of the SBOM include Cybersecurity and Integration related data and documents a record of the details and supply chain relationships of the elements that comprise a software baseline for a specific Department of Defense (DoD) product, component, system, or application. The cognizance and knowledge of the key software elements that are installed on any DoD system, equipment or device aids with timely risk analysis, vulnerability management and remediation associated with the instance and/or use of software applications, libraries, source code and executables. The SBOM Data Item Description (DID) references the mission related concerns and their integration within the system's software, firmware and supporting development libraries of source code and executables. Software obsolescence is a part of the DoD Program Manager's Total System Life Cycle Management responsibilities.[1]

A current and accurate SBOM for DoD systems enables System and Manufacturing/Production Engineers, logisticians and software developers the ease of identifying and isolating software components that pose imminent cybersecurity threats, malicious intent or compromised system operations. Potential negative impact to a system's cybersecurity posture can be thwarted with regular SBOM review.

This Data Item Description (DID) contains the format, content, and intended use of information for the data product resulting from the work task described by the contract, where a corresponding SBOM for each program phase is defined.

[1] Software Obsolescence, Firmware Versioning Configuration Control, Diminishing Manufacturing Source (DMS), Anti-Tamper and Critical Component management are the direct responsibility of the Lead System and Logistics Engineers assigned to the DoD Program of Record.

Requirements:

1. Format. Field Name, Definition, Notes, Data Type (see Table 1)

2. Content. The SBOM shall contain all information specified below. Fields which do not require data shall be left blank. Below contains a glossary of terms provided for the field content entries followed by the Format in Table 1 and an example in Table 2.

    A. Supplier
        - This is the name of the supplier or software originator.
    B. Supplier Point of Contact
        - This is the contact information for the supplier point of contact to include organization, email, and phone number.
    C. Supplier Cage Code(s)
        - This is the CAGE code that has been assigned to the supplier by Defense Logistics Agency (DLA).
    D. Software Type
        - This describes whether the software is Commercial Off the Shelf (COTS), Government Off the Shelf (GOTS) or Supplier Proprietary Developed.
    E. Software Use
        - This describes the software end use within the system such as Application Interface (API), Library, Compiler, Tool, Software as a Service (SaaS), Firmware, or Operating System.
    F. Free and Open Source
        - This is a flag to signify whether this software is (FOSS)
    G. Software Name
        - This is the formal name of the software.
    H. Component/Application Identifier
        - This is the equipment component or module that the software resides in.
    I. Unique Identifiers
        - This is the software version designator or the logical reference to software build version update.
    J. Dependency relationship
        - This specifies the software required for component operation.
    K. Hash
        - This is the hash value.
    L. Hash Function
        - This is the hash function with specificity.
    M. Previous SW Version
        - This is the software transition/build-up to arrive at this version.
    N. Licensing Restrictions
        - This identifies if there are any restrictions levied on the license. The specific restrictions are not included.
    O. Licensing Expiration

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:04Z
Check the source to verify that this is the current version before use.

- This is the expiration date for the license.

P. Uniformity implementation
    - This is the description of how the software is uniformly applied and date when implemented.

Q. SBOM Product Owner / Custodian
    - This is the contact information for the authority for the software product.

R. Date stamp
    - This is the date for the SBOM at the time of program phase delivery.

S. Program Phase
    - This is the program phase for which this SBOM applies based on DoD Acquisition Pathways.

Table 1: Field Definitions and Instructions

Field Name	Definition	Notes and Instructions	Data Type
Supplier	The full legal name of the entity that actually develops the referenced software (application, function, libraries)	Refer to example in Table 2	Alphanumeric
Supplier Street Address	Number and street name	If internationally developed, provide US landing	Alphanumeric
Supplier City	Supplier City	If internationally developed, provide US landing	Alphanumeric
Supplier State	Supplier State	If internationally developed, provide US landing	Alphabetic (XX)
Supplier Post Code	Supplier Post Code	If internationally developed, provide US landing	Numeric (XXXXX)
Supplier Point of Contact	Point of Contact at the supplier of the software	Leave blank if unavailable	Alphanumeric (Last, First, MI; Organization; email) Numeric (phone)
Supplier Cage Code(s)	A Commercial and Government Entity (CAGE) Code is a unique identifier assigned to suppliers to US government and DoD agencies.	Leave blank if unavailable or not applicable; if multiple, list with semicolon separating each	Alphanumeric (XXXXX)
Software Type	The origination of the software; identify the type of software that is included	Refer to example in Table 2	Selection: COTS GOTS
Software Use	Describes how the software is used within the system	Identifies software use such as (Application Interface (API), Library, Compiler, Tool, etc.)	Alphanumeric
Free and Open Source (FOSS)	This is a field that operates as a flag	Identifies whether this is a FOSS item	Selection: Yes No
Software Name	The formal name or designation of the software	Exclude version information which should be included in unique identifier	Alphanumeric
Component/Application Identifier	The Component / Unit where the software resides; identify the applicable subsystem function	Refer to example in Table 2	Alphanumeric

Check the source to verify that this is the current version before use.

Unique Identifiers	The designator assigned to the version of software	Refer to example in Table 2	Alphanumeric
Dependency relationship	Identify any libraries or applications required for component operation (dependent upon) provided via the supply chain. Per NTIA, a dependency is characterized as "an upstream component X is included in software Y."	Use semicolons separating each	Alphanumeric
Hash	Identify the use of a hash function for this software element	Leave blank if not applicable	Alphanumeric
Hash Function	A hash function is any function that can be used to map data of arbitrary size to fixed-size values, though there are some hash functions that support variable length output.	Leave blank if not applicable	Alphanumeric
Previous SW Version	Identify the previous software origin / baseline	Leave blank if not applicable	Alphanumeric
Licensing Restrictions	Basis for licensing and use agreement	Refer to example in Table 2	Selection: Yes No
License Expiration	Date license expires	Refer to example in Table 2	Alphanumeric (YYYYMMDD)
Uniformity implementation	Identify dates for any modifications or tailored use of software	Leave blank if not applicable; If multiple, separate by semicolons	Alphanumeric
SBOM Product Owner / Custodian	System Product Owner/Custodian	Refer to example in Table 2	Alphanumeric (Last, First, MI; Organization; email) Numeric (phone)
Date stamp	Auto-generated date for SBOM completion/update	Refer to example in Table 2	Alphanumeric (YYYYMMDD)
Program Phase	As defined in the adaptive acquisition framework	Identify the phase based on the acquisition pathway selected that the SBOM supports. Pathways include: 1. Urgent Capability Acquisition	Alphanumeric from the list below: **1. Urgent Capability**

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:04Z
Check the source to verify that this is the current version before use.

		2. Middle Tier of Acquisition 3. Major Capability Acquisition 4. Software Acquisition 5. Defense Business Systems 6. Acquisition of Services Data type should only include Phase, not Pathway	**Acquisition:** Pre-Development Development Production & Deployment **2. Middle Tier of Acquisition:** Rapid Prototyping Rapid Fielding **3. Major Capability Acquisition:** Material Solutions Analysis Technology Maturation and Risk Reduction: Engineering and Manufacturing Development Production and Deployment **4. Software Acquisition:** Planning Phase Execution Phase **5. Defense Business Systems:** Capability Need Identification Solution Analysis Functional Requirements and Acquisition Planning Acquisition Testing, and Deployment Capability Support **6. Acquisition Services:** Plan Develop

			Execute

3. Media Requirement: The SBOM shall be in an electronic format that supports auto generation and machine readability, and it is based on formats such as SPDX and CycloneDX.

4. Other considerations: this Data Item Description formally documents the actively maintained software and enables the awareness of currently supported software applications.

Table 2. Sample Field Entries

This table provides sample entries in blue.

FIELD ENTRY	DESCRIPTION	CONTEXT/EXAMPLE
Supplier	This is the name of the software supplier or originator.	Formal business name • Microsoft • Adobe • ACME Defense (subcontractor developed) **Microsoft**
Supplier Point of Contact	This is the contact information for this supplier.	Supplier Contact information • Contact person/organization (if available) • Phone number (if available) • Email (if available) **Smith, John** **202-555-xxxx** **John.Smith@ACME.com**
Supplier Cage Code(s)	This is the CAGE code formally assigned by DLA.	Supplier CAGE code (if available) • CAGE code #1; CAGE code #2 **AB123; ZF567**
Software Type	Select from list	Selection: • COTS • GOTS **COTS**
Software Use	Describes how the software is used within the system	Identifies software use **Application Interface (API)**

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:04Z
Check the source to verify that this is the current version before use.

Free and Open Source	Identifies whether FOSS	(Yes/No) **No**
Software Name	This describes the formal name of the software.	Formal software designation name **Power Shell**
Component/Application Identifier	This specifies the component/subcomponent	Component identifier **Heads-up Display Unit – XYZ-789**
Unique Identifiers	Software specificity	Software specific version **3.1.1**
Dependency relationship	This specifies the software required for component operation	Component dependencies ~~**MS Windows; DirectX**~~ **Application ABC, Library XYZ**
Hash	This is the hash value	Hash value reference **5XXXXXXXXXXXXXXXXXXXXXXXXXXX**
Hash Function	This is the hash function specificity	Hashing function reference (if available) **SHA256-CRYPT**
Previous SW Version	Includes previous software version for traceability	Software specific version **3.0**
Licensing Restrictions	Software license restrictions	(Yes/No) **Yes**
License Expiration	Date that license expires	License current through YYYYMMDD **20261215**
Uniformity implementation	Software applied with modifications and dates associated	Applied software uniformity **Modified 20221015; Recompiled 20221220**
SBOM Product Owner / Custodian	Product owner particulars	Authority/Custodian • Program Office ABC • DoD – three-letter organization **Program Office VWX** **DoD – AB-ZVN**
Date stamp	This is the date for the SBOM at the time of program phase delivery.	Phase delivery date YYYYMMDD **20220315**
