DATA ITEM DESCRIPTION

Title: Communications Security (COMSEC) Integration Test Report (ITR)

Number: DI-SCRE-82523
AMSC Number: 10641
DTIC Applicable: No
Preparing Activity: 19
Applicable Forms: N/A

Approval Date: 20260410
Limitation: N/A
GIDEP Applicable: No
Project Number: SCRE-2026-002

Use/Relationship:

The COMSEC Integration Test Report (ITR) provides data and information necessary to evaluate compliance of a system with its host integration requirements based on an approved Integration Evaluation Document (IED) (see DI-SCRE-82522), including the discussion of recommended corrective actions, if needed.

This Data Item Description (DID) is applicable to all systems integrating National Security Agency (NSA) High Assurance Devices (HADs) and provides a detailed description of each test and the subsequent results used to validate the assessment of how the HAD is being securely integrated into any host system. The intent of this document is to provide sufficient information regarding the integration testing of the system to determine the adequacy of the design and to ensure that all host integration security requirements are met. The criteria to be tested are outlined in the program-specific host integration requirements and Integration Evaluation Document (IED) DI-SCRE-82522, cited above. For the purposes of this document, the term "system" refers to the entire space vehicle not including the hosted payloads.

This DID contains the format and content preparation instructions for deliverable generation in support of the specific and discrete task requirements for this data item, as described in the contract.

Note: This DID is directly linked to and associated with DI-SCRE-82522, *COMSEC Integration Evaluation Document (IED).*

Requirements:

1. **Reference Documents.** Email jyoti.woodman.1@spaceforce.mil to request access to reference documents:

    1.1. Cryptographic Modernization Office – Space (CMO-S), *Preparation of Communications Security (COMSEC) Program Deliverables: Guidance for Space Force Program Offices and Industry Partners*

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:04Z
Check the source to verify that this is the current version before use.

2. **Compliance Documents.** The COMSEC ITR shall demonstrate, describe, and maintain compliance with the applicable sections of each document cited below. Email jyoti.woodman.1@spaceforce.mil to request access to compliance documents:

   2.1. CMO-S, *Host Integration Functional Requirements Document for the Space Vehicle Design of a Bypass External to the Cryptographic Device*

   2.2. Additionally, in conducting testing associated with the COMSEC ITR deliverable document, the data provided in the COMSEC ITR shall be compliant with the Contractor's COMSEC IED, separately described under DI-SCRE-82522 and approved by the Government.

3. **Format.** The Contractor's COMSEC ITR shall contain narrative content, diagrams, and technical detail addressing each of the topics delineated in the following major sections and subsections, and provide data using the electronic preparation instructions below. The COMSEC ITR shall:

   3.1. Be formatted strictly in accordance with the COMSEC ITR Template established for this purpose and that is included in this DID.

   3.2. Be appropriately classified and portion marked in accordance with requirements provided in the Contractor's DD Form 254.

   3.3. Be submitted in Microsoft Word format for initial submission and either Microsoft Word format or Adobe PDF format after review and validation for submission to the Government Program Office. Microsoft Word format is preferred as it supports more efficient tracking and management of changes.

   3.4. **Not** contain embedded files (i.e., Microsoft Visio drawings). All embedded pictures and diagrams must be converted to a JPG, PNG, TIFF, or GIF.

   3.5. Include a title page that identifies the following:

      3.5.1. Program Name

      3.5.2. Contract Number

      3.5.3. Version/revision and date

      3.5.4. Contractor Program Manager's name and telephone number and, if applicable, the Government Program Office Point of Contact name and office designator

      3.5.5. Security Classification

      3.5.6. Distribution Statement

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:04Z
Check the source to verify that this is the current version before use.

3.6. Include a Revision Page, listing all past changes to the document in reverse chronological order.

3.7. Include a list of Reference and Compliance Documents, to include those cited in 1. & 2., above, and all other documents used to develop the COMSEC ITR.

3.8. Include a Table of Contents.

3.9. Include a Table defining all the abbreviations and acronyms.

4. **Content.** The COMSEC ITR shall:

4.1. Be completed using the Integration Test Report (ITR) Template, Version 1.0, included in this DID. **Note**: Not all requested information will apply. Wherever requested information does not apply, identify it as "N/A."

4.2. The COMSEC ITR Template follows.

ACRONYMS AND ABBREVIATION LIST

Acronym	Description

1 SYSTEM REQUIREMENTS AND OPERATIONAL ENVIRONMENT

Provide a concise description of the scope and intent of the COMSEC ITR. This information includes an overview of the integration components and technology, if applicable, of the system to be protected as well as a summary of the tests to be completed. Include a list of tests performed with pass/fail or met/not met indications.

Include a table listing the applicable host integration functional requirements.

1.1 Scope

1.2 Overview

2 SECURITY REQUIREMENT TESTS

This section includes the detailed results of each test by listing each integration security requirement and the evidence used to verify the system's compliance. Use tables, figures, and detailed descriptions to adequately convey the results and conclusions of each test. Functions to be tested include, but are not limited to:

a. HAD integration

b. External security functions such as bypass policy enforcement

3 CONCLUSIONS AND RECOMMENDATIONS

Conclusions and recommendations shall be provided, including results of the tests in brief narrative form, a discussion of any remedial actions already initiated, and proposed corrective measures required (if necessary) to assure compliance of the system with integration security requirements.

4 REFERENCE DOCUMENTS

- [All cited in Section 1., above]
- Operational Security Doctrine (OSD) associated with the integrated HAD
- Interface Control Documents (ICD) associated with the integrated HAD
- User's Guide/Manual associated with the integrated HAD

5 COMPLIANCE DOCUMENTS

- [All cited in Section 2., above]
- *[List all applicable compliance documents]*

APPENDIX A: SECURITY DESIGN REQUIREMENTS COMPLIANCE AND VALIDATION

Req No.	*Requirement*	*Verification Method*	*Compliance Plan*	*Verification Plan*

APPENDIX B: COMMENT AND RESPONSE MATRIX

Appendix B of the COMSEC ITR tracks comments along with the appropriate Developer responses and changes. These responses must answer the question or comment and reference corresponding locations in the body of the document where the content was updated in response to the comment, and marked by change bars. These comments and responses include remedial actions conducted to address deficiencies and remain within the COMSEC ITR for each revision.
