Data Item Description

Title: MID AFT TAIL TEST SET (MATTS) REDESIGN VERIFICATION PLAN

Number: DI-SESS-82504
AMSC Number: N10605
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20251030
Limitation: N/A
GIDEP Applicable: N/A
Project Number: SESS-2025-041

Use/relationship: The plan documents the approach for verifying the redesign MATTS station meets all applicable requirements.

This Data Item Description (DID) contains the format, content, and intended use information for the data product resulting from the work task described in the contract Statement of Work (SOW).

Requirements:

1. Reference documents. Requirements Traceability Verification Matrix. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract."

2. Format. The plan shall be in contractor's format.

3. Content. The plan shall contain the following:

3.1. Description of the System

3.2. Requirement to verification activity traceability

3.2.1. For verification via inspection, include:

3.2.1.1. Standard documentation, or drawing against which inspection will be performed

3.2.2. For verification via analysis include:

3.2.2.1. Assumptions

3.2.2.2. Rationale for approach

Check the source to verify that this is the current version before use.

3.2.3. For verification via test include:

3.2.3.1. Assumptions and constraints

3.2.3.2. Facilities and resources required

3.2.3.3. Data required

3.2.3.4. Test Equipment required

3.2.3.5. Configuration of item under test

3.2.4. For verification via demonstration include:

3.2.4.1. Assumptions and constraints

3.2.4.2. Facilities and resources required

3.2.4.3. Configuration of item under test

3.2.5. For verification via similarity include:

3.2.5.1. Previous verification activity being leveraged

3.2.5.2. Rationale on why design change does not invalidate previous verification

3.2.6. For verification via modeling and simulation include:

3.2.6.1. Assumptions and constraints

3.2.6.2. Verification, validation, and accreditation approach for simulations

3.2.6.3. Limitations of Modeling & Simulation (M&S)

3.3. Verification activity to anticipated resultant documentation traceability

3.4. Flow of all verification activities

3.5. Notional scheduling and locations of all verification activities

End of DI-SESS-82504
