MILITARY SPECIFICATION

Marking of Aircraft Ground Support Equipment and Other Flight Line Vehicles with Retro-Reflective Materials; process for

This specification has been approved by the Naval Air Systems Command, Department of the Navy

1. SCOPE

1.1 This specification prescribes general requirements for the marking of aircraft ground support equipment and other vehicles (i.e., runway sweepers, firetrucks, refulers, etc.) , used on or near the flight line area with retro-reflective materials.

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on the date of invitation for bid or request for proposal, form a part of this specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

L-S-300	Sheeting and Tape, Reflective: Non-exposed Lens, Adhesive Backing
TT-C-001060	Coating, Mixture, Reflective Liquid
TT-V-109	Varnish, Spar, Alkyd-resin

(When requesting applicable documents, refer to both title and number. Copies of unclassified documents may be obtained from the Commanding Officer, Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, Pennsylvania 19120).

3. REQUIREMENTS

3.1 General. When specified in contracts, orders, specifications or drawings , aircraft support equipment and other flight line vehicles shall be marked with reflective tape conforming to L-S-30, Type II, Class 3, Reflect.lv~ty No. 1, Color g, Width 2 inches. The tape shall be applied along the extreme perimeter of the equipment to reflect its general outling configuration, when operating under reduced lighting conditions. When possible, the tape shall be applied to delineate the entire perimeter of the equipment. however, equipment having perimeter surfaces containing compound curves at the corners or large rivets, nuts, bolts, etc. need not be marked in these particular areas provided the marking provides a general outline of the equipment. Application of the reflective material shall not obliterate other markings (i.e., caution, capacity, danger, name plates, servicing/safety instructions, product marking, etc.). Wheel chocks, tie downs and other small equipment whose configuration does not readily lend itself to the appliction of reflective tape shall be marked with 2 inch circular stripes of reflective paint (i.e., wheel chocks shall be marked around the middle and each exposed end). The paint shall conform to the requirements of Specification TT-C-001060, Color No. 7211.

3.2 Marking Procedures:

3.2.1 Surface Preparation: The surface to which the tape or paint will be applied shall be cleaned of all loose scale and dirt; all deposits of cleaning compounds shall be removed. The surface shall be thoroughly dried.

3.2.2 Application: Apply in accordance with the manufacturers instructions. Insure that all air bubbles are removed when tape is applied Do not apply at temperatures below 50°f. NOTE: Do not oven bake equipment after the reflective material has been applied.

3.2.3 Sealer: Sealing compound conforming to TT-V-109 shall be applied to the edges of the tape in the form of a fillet to protect the tape.

3.3 Workmanship: The reflective material shal not be haphazardly applied and shall be free from ragged edges, viods, cracks, scales, air bubbles, blisters or dirt.

Check the source to verify that this is the current version before use.

4. QUALITY ASSURANCE PROVISIONS

4.1 Inspection: Equipment shall be thoroughly inspected to determine compliance with all requirements specified in paragraph 3.

4.2 Tests: After equipment has been subjected to all tests specified in the equipment specification, the reflective marking shall be subjected to the adhesion test specification specified in paragraph 4.4.9.6 of L-S-300.

5. Preparation for Delivery: N/A

6. Notes.

6.1 Intended Use: To provide improved visibility of flight line support equipment and vehicles under reduced lighting conditions.
