MILITARY SPECIFICATION

CANISTER LOADING ASSEMBLY FOR, PROJECTILE, 155MM, SMOKE: M825

This specification is approved for use by US Army Armament, Munitions and Chemical Command, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers quality assurance provisions and preparation for delivery for the parts and loading, assembling and packing of Canister, Projectile, 155MM, Smoke: M825.

2. APPLICABLE DOCUMENTS

2.1 Government documents.

2.1.1 Specifications, standards, and handbooks. Unless otherwise specified, (see 6.1), the following specifications, standards, and handbooks of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation form a part of this specification to the extent specified herein.

SPECIFICATIONS

MILITARY

MIL-A-48078 - Ammunition, Standard Quality Assurance Provisions, General Specification For.
MIL-F-48277 - Fuze, Point Detonating, M739, Less Booster Pellet.

: Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Commander, US Army Armament, Munitions and Chemical Command, ATTN: AMSMC-TDC-S (A), Aberdeen Proving Ground, MD 21010-5423 by using the self-addressed Standardization Document improvement Proposal (DD Form 1426) appearing at the end of this document or letter.

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.

2.1.2 Other Government documents, drawings, and publications. The following other Government documents, drawings, and publications form a part of this specification to the extent specified herein.

DRAWINGS (see 6.4)

US ARMY ARMAMENT, MUNITIONS AND CHEMICAL COMMAND

CHEMICAL RESEARCH AND DEVELOPMENT CENTER

15-12-273 - Canister Loading Assembly.

(Copies of specifications, standards, handbooks, drawings, and publications required by manufacturers in connection with specific acquisition functions should be obtained from the contracting activity or as directed by the contracting officer.)

2.2 Order of precedence. In the event of a conflict between the text of this specification and the references cited herein, the text of this specification shall take precedence.

3. REQUIREMENTS

3.1 Material. Materials shall be in accordance with the applicable drawings, specifications and standards.

3.2 Parts. All parts shall comply with applicable drawings, specifications and standards.

3.3 Canister loading assembly. The canister loading assembly shall comply with requirements specified on Drawing 15-12-273, all associated drawings, and with all requirements specified in applicable specifications and standards.

3.4 First article inspection. This specification contains technical provisions for first article inspection. Requirements for the submission of first article samples by the contractor shall be as specified in the contract.

3.5 Workmanship. All parts and assemblies shall be fabricated, loaded and assembled in a thorough, workmanlike manner. They shall be free of burrs, chips, weld spatter, sharp edges, chipped edges, gouges, cracks, surface defects, dirt, grease, rust, corrosion products, dents, white phosphorus, and other foreign matter. The cleaning method used shall not be injurious to any

part nor shall the parts be contaminated by the cleaning agents. All requir markings shall be neat and sharply defined. External threads shall be full, complete and undamaged for their entire length.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection and standard quality assurance provisio Unless otherwise specified herein or in the contract, the provisions of MIL-48078 shall apply and are hereby made a part of this detail specification.

4.2 Classification of inspections. The inspection requirements specified herein are classified as follows:

(a) First article inspection (see 4.3).
(b) Quality conformance inspection (see 4.4).

4.3 First article inspection.

4.3.1 Lot. A preproduction lot of 500 canister loading assemblies or one shift production; whichever is greater, shall be produced using the same methods, materials, equipment, and processes as will be used during regular production.

4.3.2 Submission. The contractor shall submit a first article sample as designated by the contracting officer for evaluation in accordance with provi sions of 4.3.3. The first article sample shall consist of the following iten in sample quantities as indicated below and table I.

Part description	Drawings	Quantity
Canister loading assembly	15-12-273	50

4.3.3 Inspections to be performed. See Mil-A-48078 and table I specified herein.

4.3.4 Rejection. See MIL-A-48078.

4.4 Quality conformance inspection.

4.4.1 Inspection lot formation. Inspection lots shall comply with the lo formation provisions of MIL-A-48078. In addition, each lot shall contain:

(a) Safing and arming module assemblies of one lot interfix number from one manufacturer and complying with MIL-F-48277.

(b) Canisters, 155MM, WP, of one lot interfix number from one manu facturer.

(c) Delay Detonators of one lot interfix number from one manufac- turer.

(d) Bursters of one lot interfix number from one manufacturer.

4.4.2 Examination. See MIL-A-48078.

Sampling plans. Unless otherwise specified in the classification of defects and tests tables, sampling plans and procedures for major and minor defects shall be in accordance with MIL-STD-105, inspection level II.

CLASSIFICATION OF DEFECTS & TESTS

PARAGRAPH	TITLE		SHEET 1 OF 1		DRAWING NUMBER 15-12-273
4.4.2.1	Canister Loading Assembly				NEXT HIGHER ASSEMBLY
CATEGORY	EXAMINATION OR TEST	NO. OF SAMPLE UNITS	AQL OR 100%	REQUIREMENT PARAGRAPH	PARAGRAPH REFERENCE /INSPECTION METHOD
Critical	None defined				
Major					
101	Evidence of WP contamination in burster well		100%	3.3	Visual
102	Torque incorrect (part not fully seated). (Torque where questionable)		0.40%	3.3	Visual/Gage
103	Height of retainer above front plate, max		0.40%	3.3	Gage
104	Part or assembly missing		0.40%	3.3	Visual
105	Burster incorrectly oriented		0.40%	3.3	Visual
106	Spring pin in front plate incorrect or missing		0.40%	3.3	Visual
107	Safing and arming module incorrectly oriented. Retainer not fully threaded into canister.		0.40%	3.3	Visual
108	Sealing compound missing from retainer threads or detonator threads		0.40%	3.3	Visual
109	Delay detonator not fully seated in retainer		0.40%	3.3	Visual
Minor					
201	Workmanship		1.0%	3.5	Visual

4.4.3 Testing. Testing is described in the First Article and Quality Conformance Inspection tables.

4.4.4 Inspection equipment. The inspection equipment required to perform the inspections and tests prescribed in this specification is identified in the "Paragraph Reference/Inspection Method" column in the tables starting with paragraph 4.4.2.1, and the test method paragraph (see 4.5). The contractor shall submit for approval inspection equipment designs in accordance with the terms of the contract. See section 6 of MIL-A-48078 and 6.3 herein.

4.5 Methods of inspection.

WARNING: This specification covers sampling and testing of chemical, toxic or explosive materials which are potentially hazardous to personnel. All applicable safety rules, regulations and procedures shall be followed in handling and processing these materials.

5. PACKAGING

The canister loading assembly shall be handled in intraplant operations in a manner to prevent physical and moisture damage (see 6.1).

6. NOTES

6.1 Projectile loading. The canister loading assembly, is subsequently assembled into the 155MM projectile carrier body: M825. Normally, it should not be shipped between plants (interplant), but loaded and assembled in conjunction with and adjacent to the loading, assembly and packing of the projectile.

6.2 Ordering data. See MIL-A-48078.

6.3 Submission of inspection equipment designs for approval (see MIL-A-48078). Equipment designs shall be submitted as required to: Commander, US Army Armament, Munitions and Chemical Command, ATTN: AMSMC-QAC-M (A), Aberdeen Proving Ground, MD 21010-5423. Request letter of submittal should state contractor, contract number, specification number, item nomenclature, and classification of defects and tests paragraph number.

6.4 Drawings. Drawings listed in section 2 of this specification under the heading US Army Armament Research and Development Command (ARRADCOM) may also include drawings prepared by, and identified as, Edgewood Arsenal, Frankford Arsenal, Rock Island Arsenal or Picatinny Arsenal drawings. Technical data originally prepared by these activities are now under the cognizance of AMCCOM.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use i submitting comments and suggestions for improvements. All users of military standardization documents are invited to provid suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, an mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, w too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
